Mr Ted McEnery
Clerk to the Committee
Committee of Public Accounts
Leinster House
Dublin 2

10 October, 2012

Dear Mr McEnery

I refer to your letter dated 21st September 2012 advising that as part of its on-going scrutiny of public expenditure with Accounting Officers and heads of State bodies the Committee has agreed to examine the payment of allowances to staff.

In responding to your request for information I have attached the detail on all allowances identified in the HSE for the Review of Allowances conducted by the Department of Public Expenditure and Reform, the outcome of which was advised by Government on 18th September 2012. Of the 41 allowances identified, Business Cases were provided for 20 allowances considered appropriate to continue for new beneficiaries with some allowances requiring further review and consultation with line management and staff representatives before a decision to continue as is, cease or modify could be made.

For your information the HSE's approach to the Review was based on the following principles:

- There must be evidence of significant added value for the patient/service delivery
- Consideration must be given to clinical risk and patient safety which can require staff to assume higher roles and responsibilities
- Equity and fairness must apply for all grades of staff
- There must be full compliance with the Financial Regulations
- Standardisation in line with the terms of the Public Service Agreement must be considered
- Continuation of allowances must comply with the Moratorium on Recruitment and Promotions in the Public Sector and must have Senior Management endorsement

The outcome of our initial review was submitted to the DPER in mid February 2012.

The submission sought approval from DPER to consider the health sector allowances in four groupings, as follows:

1. Allowances required for existing and new beneficiaries post 31st January 2012.

Sanction was sought for the continued payment of allowances numbered 1 – 6 which are considered essential to ensure continuity of a safe and quality service delivery. The continuation of these allowances acknowledges the arduous nature and/or unsocial hours; skills and experience; qualifications; and additional responsibilities associated with the duties undertaken. It is considered that the benefit to the organisation in the continued payment of these allowances is the delivery of a cost effective solution to the provision of services. Business Cases were submitted for all 6 allowances.

2. Allowances required for existing and new beneficiaries post 31st January 2012 but subject to further review.

Sanction was sought for the continued payment of allowances numbered 7 – 16 subject to further review. It was not possible within the given timeframe to give due consideration to the retention, modification or cessation of the allowances in this category. Initial review with our service managers indicated that while there may be scope to modify or cease some of these allowances the timeframe given to assess the effect on service delivery was not sufficient. This was further compounded by the impending exit of in excess of 3,000 staff at the end of the 'Grace Period' most of which were front line personnel, with 1,700 of those representing nursing personnel.

3. Allowances proposed for cessation pending further consultation with service management and the trade unions. It was considered appropriate to propose ceasing allowances numbered 17 – 30 for new beneficiaries with effect from 1st February 2012. The justification for the continued payment of these allowances has been overtaken by developments in qualifications, duties, skills and normal flexibilities now expected or required in public sector employment as agreed through the PSA. No Business Cases were submitted for these 14 allowances as management proposed these allowances for cessation.

4. Allowances currently paid to existing employees but not currently paid to new employees - Red-Circled arrangements to groups or individual employees. Allowances numbered 31 – 37 are allowances agreed on a personalised basis that have ceased to be paid to new employees under the terms of their agreement. These allowances should be removed from the Allowances Section of the Consolidated Pay Scales and moved to the Pension Section for calculation purposes only and to acknowledge that there are existing staff currently being paid these allowances that may or may not have

the allowance considered in the calculation of their pension. No Business Cases were submitted as these allowances are no longer paid to new beneficiaries.

Early in September 2012 the HSE made a further submission to DPER, which included 4 additional allowances (Nos. 38 – 41) not included in the original submission made in February 2012, with the request that these allowances would be included in the first grouping of allowances required for new and existing employees.

The HSE submissions made above were reviewed by Government and the final decisions made on each of the allowances is detailed beside each allowance in the attached excel sheet and is colour coded for ease of reading. As instructed by Robert Watt, Secretary General, DPER, the HSE intends to engage immediately with staff interests to action Government decision as advised.

In addition it should be noted that the information supplied in the initial health sector review reflects allowances paid in the HSE only. An exercise to capture any other local allowances in the Voluntary Sector has just been completed and will be submitted to DPER in the coming week.

I trust this information will be helpful to the Committee in its examination of allowances in the public health sector.

Yours sincerely

Tony O'Brien
Director General Designate

Health Service Executive Allowances Review - Information for Public Accounts Committee

9th October 2012

No. Of Allowance	Name of Allowance	Range of Payment	Beneficiary (Grade)	Number of Current Recipients (estimated)	Time-bound?
